

AXIS is a state-of-the-art forming facility located in northeast Arkansas. From the receipt of raw material to loading the finished product for delivery, all operations are handled under one roof in a continuous, fully automated process. This unique facility offers maximum flexibility to produce high and low volume production runs without change over and setup delays.

16" diameter billet at 2,200°

Forging a dual axle

Finished forging

Automated machining & inspection

Finished product ready for packaging

Forming Capabilities

- Circular and non-circular billets
- Cross Sectional Area: 0.02m² to 0.15m²
- Lengths: 1.0m to 5.5m

Finish Product Capabilities

- Cross Sectional Area: 0.01m² to 0.10m²
- Lengths: 1.0m to 3.0m
- Tolerances: +/- 4 microns
